

EXCELLENCE AT EVERY STAGE

Pre-Engineered Buildings & Structures Division

VISION:

Our vision is to emerge as a prominent global player and lead the industry with innovative and sustainable Pre-engineered steel buildings and structures by cultivating a passionate and committed workforce while steadfastly adhering to industry best practices.

MISSION:

We leverage our wealth of experience and specialized expertise to deliver premium-quality products and services, ensuring enduring customer satisfaction. We engage with unwavering integrity and transparency whether it's with the broader community, esteemed business partners, valued stakeholders, or our dedicated employees.

METALKRAFT

Metalkraft Forming Industries Private Limited, established in 2002, is an ISO 9001:2008 certified company specializing in cold roll forming. Initially focusing on precision roll forming, Metalkraft has since grown into one of the nation's leading engineering firms. Diversifying its offerings, the company now also specializes in Pre-Engineered Buildings & Steel Structures to serve a wide array of clients across various industries.

With six cutting-edge manufacturing facilities situated in Hyderabad, Bengaluru, and Ahmedabad, Metalkraft boasts a total covered area of 5,10,000 square feet and a combined production capacity of 1,50,000 metric tons per annum. In 2024, the company achieved a revenue exceeding INR 580 Crores. Its manufacturing repertoire includes Pre-Engineered Buildings & Steel Structures, Purlins & Girts, Deck Panels, Roof & Wall Sheeting, Solar Module Mounting Structures, Door & Window reinforcement Sections, Metal Crash Barriers, and General Engineering Products. Metalkraft prides itself on delivering unparalleled speed and value to meet the commercial and industrial needs of its clientele.

Each product from Metalkraft reflects the company's expertise, skill, and engineering excellence from conception to completion.

PEB

At the heart of our innovation are our Pre Engineered Buildings (PEBs), a testament to the fusion of cutting-edge technologies in design, fabrication, and installation. We provide cost-effective solutions meticulously tailored to industry-specific requirements, revolutionizing the construction and infrastructure landscape. Driven by the forefront of engineering and technology, our team of highly skilled professionals crafts pre-engineered buildings that surpass client expectations. With meticulous attention to detail and an unwavering focus on aesthetic appeal, we bring visions to life.

DESIGN

Our team collaborates closely with you to craft a building that meets your needs and reflects your style. From structural engineering to architectural design, we ensure your building is not only safe and sturdy but also visually appealing.

FABRICATE

Quality starts with the materials. We source the finest steel and cutting-edge technology to fabricate each component with meticulous precision. Our commitment to quality control ensures that every piece meets our rigorous standards.

Our modern manufacturing facility serves as a testament to our unwavering commitment to excellence. Fully automated machinery, powered by advanced technology, enhances production efficiency, ensuring cost-effectiveness and in compliance to both regional and international building product requirements.

Experience the epitome of efficiency with Metalkraft's pre-engineered buildings, boasting a shorter erection period, minimized job site labour costs, and an expedited return of your construction capital. Embrace a new era in construction with Metalkraft, where superlative solutions redefine industry standards.

SUPPLY

Timely delivery is our promise. Once manufacturing is complete, we carefully package and transport your building components to your site. Our streamlined supply chain ensures everything arrives on schedule and in pristine condition.

INSTALL

Building your dream is a collaborative effort. Our experienced team arrives at your site ready to bring your vision to life. With efficient site preparation and expert assembly, we transform your plans into reality, delivering a finished structure that exceeds your expectations.

DISCOVER EXPERTISE IN DESIGN

Elevate your project with our specialized Pre-Engineered Building (PEB) design expertise. Our seasoned team brings years of experience and a keen eye for innovation to every project we undertake.

From intricate structural analysis to creative architectural design, we excel in crafting PEB solutions that meets client expectations. Our commitment to excellence is evident in every detail, ensuring your building stands the test of time.

Partner with us to unlock the full potential of PEB design.

DESIGN EXPERTISE

UNLOCK THE POWER OF FABRICATION EXPERTISE

Experience the pinnacle of precision and quality with our specialized Pre-Engineered Building (PEB) fabrication expertise. With a focus on cutting-edge technology and meticulous attention to detail, we transform raw materials into masterpieces of engineering excellence.

Our seasoned craftsmen harness the latest manufacturing techniques to ensure that every component meets the highest standards of durability and performance.

From steel beams to roof panels, our expertise shines through in every weld and seam. Partner with us to elevate your project with unmatched PEB fabrication expertise. Witness the difference turning your vision into reality.

Major Machineries List

Beam Line: Used for shaping structural steel components such as beams, columns, and rafters with a maximum width upto 2.1m.

CNC Plasma Cutting: Cuts steel plates to the required dimensions accurately and efficiently.

CNC Plate Drilling Machines: Used for drilling holes in steel components for bolted connections and other purposes.

CNC Punching Machines: Punches holes or slots in steel plates and profiles for fasteners, connections, and other purposes.

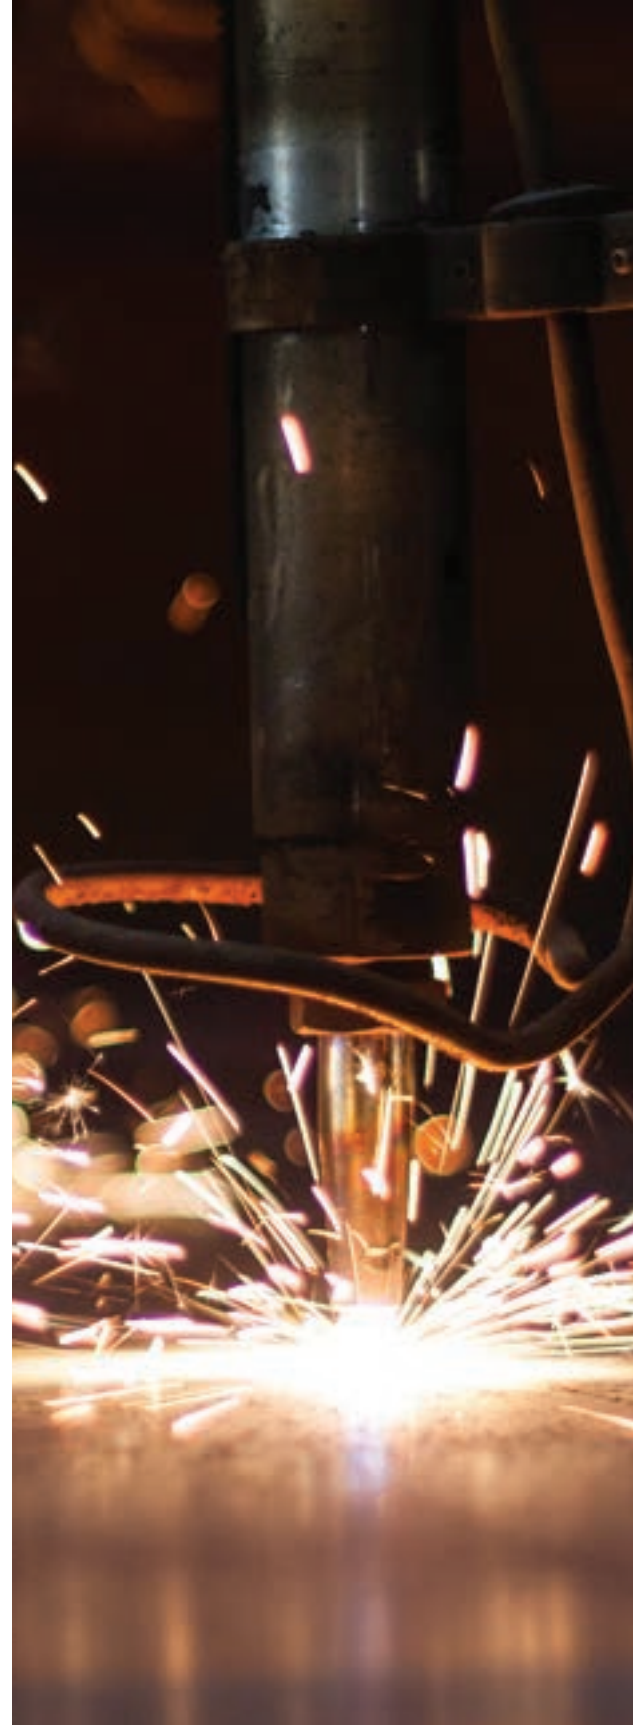

Shearing Machine: Cuts steel sheets to the required dimensions accurately and efficiently. (6.3m length & 16mm thickness)

Roll Forming Machine: Used for shaping steel coils into specific profiles such as roof panels, wall panels, and structural components like purlins and girts.

Press Brake: Bends and shapes steel plates and profiles to create components and other structural elements.

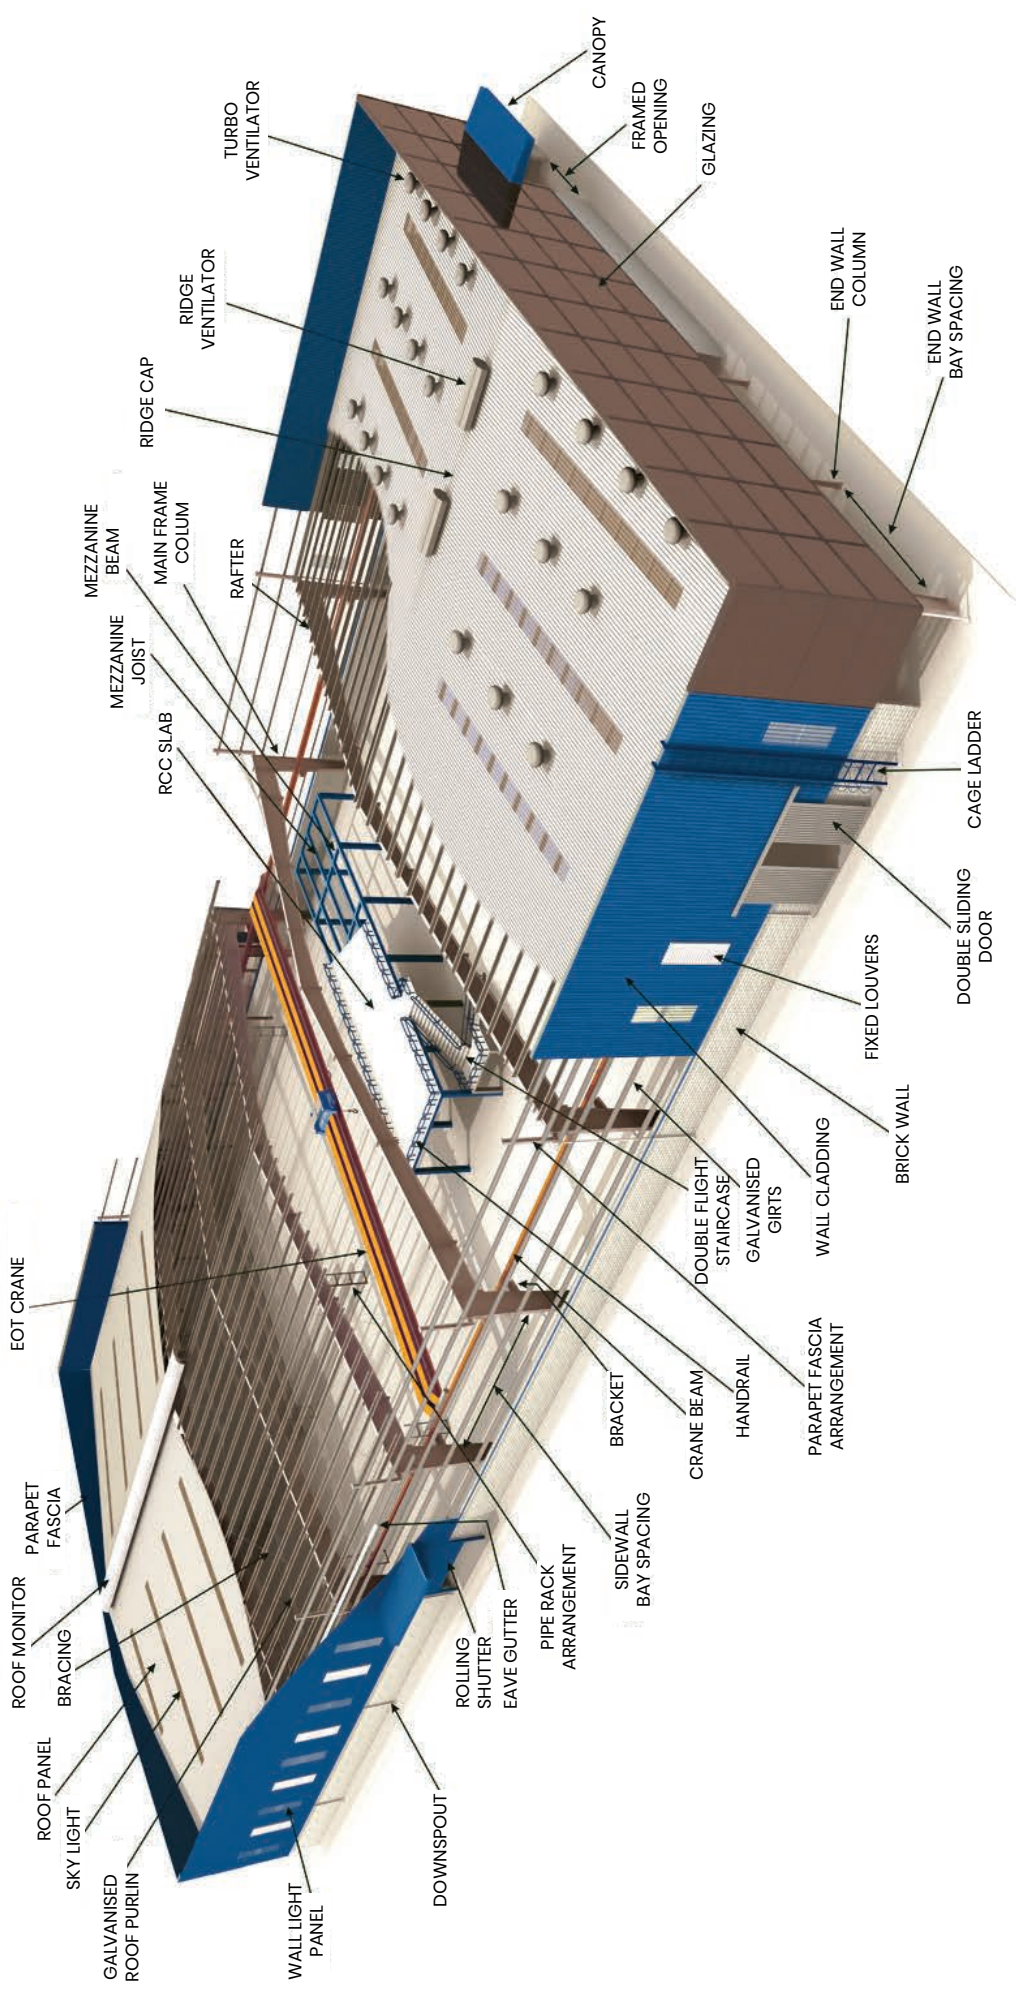

Assembly Tables and Jigs: Fixtures and tables used for accurately assembling and aligning steel components during fabrication.

Shot Blasting: Used primarily for surface cleaning & preparation of Columns and Rafters.

FABRICATION EXPERTISE

OVERVIEW OF PEB

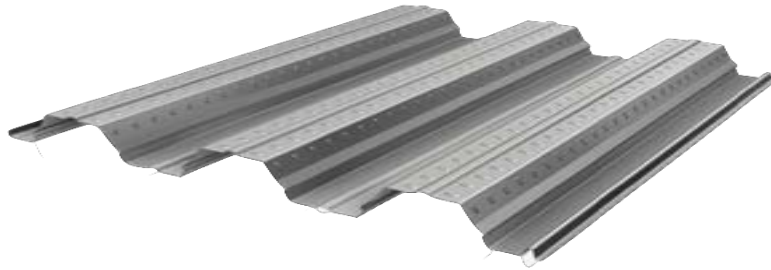

COMPONENTS

Metalkraft manufactures Building components from different grades of quality steel with requisite yield strength to minimise weight while maximising capacity. We manufacture a wide range of structural Z & C Purlins, Girts and Deck sheets for industrial buildings, sheds, storage, garages, carports, etc., where reliable solid steel framing is required.

PROJECT MANAGEMENT

We implement a client-specific order and project management approach that guarantees the timely resolution of technical issues and precise adherence to timelines. Our project management skills and meticulous attention to detail have cultivated a reliable, seamless client interface. This expertise has redefined industry standards for quality and service.

SAFETY & STRENGTH

Our company practices the highest importance on the safety and well-being of our employees. Regular safety training sessions are standard practice, and in addition, we station dedicated safety officers at every unit to ensure maximum safety. Our safety protocols are aligned with globally recognised prerequisites, making us the ideal choice as your Building Solutions partner.

BUILDER'S NETWORK

The project management team has enlisted certified builders across India to execute erections under expert supervision. They identify and recommend suitable builders based on their workload and resource size. This ensures optimal project execution and resource utilization.
